## A Kingdom Connection Changing Lives Enrichment Programs

Today, many children return to an empty home after school, and are left idle with no supervision or positive stimulation. When the school bell rings, the anxiety for parents often just begins. They worry about whether their children are safe, or whether they are susceptible to drugs and crime.

In response to this pressing concern, AKCCL provides academic-focused after school programs to schools, parents, and youth after school closes. There are certified teachers and staff that assist our students in maximizing their academic potential and social emotional development. Students are also provided snacks

The programs not only focus on supporting the schools, parents, and the student in homework completion, tutoring, and supplemental academic enhancement, but it also provides social-emotional development through recreational activities. These activities are tied into the learning theme that is selected every 6 weeks during the program.

Parents are informed of their child's growth both socially and academically. Families of students are encouraged to take advantage of Saturday activities. These are outreach services and activities at no cost to families. Visit [www.akccl.org](http://www.akccl.org) to see the services provided. AKCCL will provide access to its programs to all families based on program availability. Call our office at 225-330-2424 or

## Summer Enrichment ( AKCCL's Math & Reading Bootcamp)

The program is designed to provide a fun and social environment where students can improve their math and reading skills and explore life skills that are helpful for personal development. Students will participate in daily activities that will be geared towards supporting educational, social, and emotional development. Students will be administered a pre and post test in Mathematics and Reading in order to measure student achievement and growth.

During the first four weeks of the program, teachers reinforce the prior year's content in Math and Reading. We do not assume that a student who has been promoted to the next grade level has mastered the content. During the last four weeks of the program, teachers introduce content that students will see during the upcoming school year, which will give them a head start when returning to school.

Resources for student's learning are Learning A-Z for Reading and for Math we use IXL and various resources and assessments. These tools are resources that are aligned to the state common core. Students also engage in educational recreational, character development, and esteem group counseling activities which are tied into a learning theme.

**Educating and supporting our youth is the best way to invest in a prosperous future.**
